

Dear Contractor:

iPERMIT ERATERS, invites you to consider the most cost effective way you can obtain your building permits. With almost 30 years of experience and over 100 building contractors currently using our service, and in excess of 250,000 permits behind us, we know how to service your needs quickly and inexpensively.

We visit more building departments in a single day, than most contractors visit in a month. Using our service will reduce headaches and costs to you.

Here's how:

### 1. CITY RELATIONS

Our close relationship with municipal building departments, allows us to stay aware of specific requirements and therefore present the proper information to get the job done as expediently as possible.

### 2. PROBLEMS

Everybody knows that permits are **PROBLEMS**, but our experience helps us to eliminate most of the hang-ups that you would face.

### 3. TIME AND MONEY

Obtaining permits requires endless hours on the road in frustrating traffic, gasoline costs, expensive vehicle costs, and valuable time waiting in building department lines. Our flat fees eliminate your concern for expensive hours spent and frees your employees for the jobs that they were hired to do.

Please give us a call. We can answer any questions you may have about the variety of services we offer, and discuss your company's specific needs.

Sincerely,

**iPERMIT ERATERS**
